

Intern Needed

Nortel Netas requires part time intern for a period of 12 months or over.

The candidate should

- Have good command of English (second language preferable)
- Be familiar to perform search from Internet and from literature
- Have excellent communication skills
- Be interested in new technologies, applications in CIT
- Be able to use MS Word, Power Point and Excel
- Be available to work about two days per week

The department that the intern will join is accountable for R&D

- **Budgeting,**
- **Program Management,**
- **Planning**

as well as implementation of Lean Six Sigma (LSS) initiative within R&D organization. The applications for incentive of R&D Projects fall also within scope of the departmental activities.

Reporting to “R&D and LSS Leader”, the intern will be working under his guidance and in close cooperation with his team. The intern will receive on-the-job training while performing the jobs requested from him/her. He/she will be encouraged to participate to management seminars that will be organized for Nortel Netas employees.

The job requires full confidentiality therefore the intern will be requested to sign a Non Disclosure Agreement.

The candidate is preferably a student in Engineering (Electronic or Industry), Business Administration or Economics. **The most important qualification of the candidate is the willingness to learn.**

If you are interested in, please send an e-mail to bozce@netas.com.tr or call Barhan Özce from 542 231 22 78.
